Title Lorenz ordering of order statistics from log-logistic and related distributions

Journal Journal of Statistical Planning and Inference

Volume 120

Number 1-2

Pages / Article-Number 13-19

Keywords k-out-of-n systems, Order statistics, Lorenz order, Lifetime distributions (generalized), Log-logistic distributions

This paper obtains Lorenz ordering relationships among order statistics from log-logistic samples of possibly different sizes. Some results extend other families including the Lomax, Burr III and Burr XII distributions.
