Research Project

Research Partnerships for Mitigating Syndromes of Global Change (NCCR North-South)

Project funded by own resources

Project title Research Partnerships for Mitigating Syndromes of Global Change (NCCR North-South)

Principal Investigator(s) [Goetschel, Laurent](#) ;

Co-Investigator(s) [Péclard, Didier](#) ; [Iff, Andrea](#) ;

Organisation / Research unit

Departement Gesellschaftswissenschaften / Politikwissenschaft (Goetschel)

swisspeace foundation / Peace Research (Goetschel)

Project Website www.north-south.unibe.ch

Project start 01.07.2001

Probable end 30.06.2013

Status Completed

The NCCR North-South is an innovative **research programme** in the fields of **global change** and **sustainable development**.

Headquartered in Switzerland and encompassing a robust network of over 400 researchers active in more than 40 countries worldwide, it is dedicated to finding sustainable, practicable solutions to specific challenges of global change. Crucial to all NCCR North-South activities is a commitment to **partnership** between institutions and individuals in the **northern and southern hemispheres**. Research is collaboratively conducted with a special emphasis on the needs of developing and transition countries, since they are arguably under the most pressure due to accelerated global processes of environmental, economic and sociopolitical change.

Originally launched in 2001, the NCCR North-South is one of twenty **National Centres of Competence in Research** (NCCRs) established by the **Swiss National Science Foundation** (SNSF) to promote scientific advancement in vital research areas. It was founded in the belief that increasing our understanding of global change and identifying means of sustainable development is crucially important to Switzerland's future and that of the world. The programme is jointly funded by SNSF, the **Swiss Agency for Development and Cooperation** and the participating research institutions.
