Year 2009

Title Infection prevention strategies in a stem cell transplant unit : impact of change of care in isolation practice and routine use of high dose intravenous immunoglobulins on infectious complications and transplant related mortality

Journal European journal of haematology

Volume 83

Number 2

Pages / Article-Number 130-8

Keywords sterile care, tent, immunoglobulins, hematological stem cell transplantation, infection rate
Nursing in 'live islands' and routine high dose intravenous immunoglobulins after allogeneic hematopoietic stem cell transplantation were abandoned by many teams in view of limited evidence and high costs.
