Title Assessment of intraoperative liver deformation during hepatic resection : prospective clinical study

Journal World journal of surgery

Volume 34

Number 8

Pages / Article-Number 1887-93

The implementation of intraoperative navigation in liver surgery is handicapped by intraoperative organ shift, tissue deformation, the absence of external landmarks, and anatomical differences in the vascular tree. To investigate the impact of surgical manipulation on the liver surface and intrahepatic structures, we conducted a prospective clinical trial.
