Title Acute and long-term outcome of Silverhawk assisted atherectomy for femoro-popliteal lesions according the TASC II classification: a single-center experience

Journal Vasa

Volume 39

Number 3

Pages / Article-Number 229-36

Keywords Atherectomy, silverhawk, femoropopliteal lesions, TASC II classification

Directional atherectomy (DA) has become popular in some centers to remove atherosclerotic plaques in femoro-popliteal lesions. Although immediate and also short - term outcome data are promising, solid long-term data are warranted to justify the widespread use in daily practice.
