Title C-reactive protein is superior to bilirubin for anticipation of perforation in acute appendicitis

Journal Scandinavian journal of gastroenterology

Volume 45

Number 7-8

Pages / Article-Number 885-92

Keywords Appendicitis, bilirubin, C-reactive protein, leukocyte count, perforation

Very recently it has been shown that hyperbilirubinemia is a specific predictor of perforation in acute appendicitis. We compared the diagnostic importance of bilirubin, C-reactive protein (CRP), leukocyte count and age as markers of perforation in acute appendicitis.
