Title A comprehensive analysis of p16 expression, gene status, and promoter hypermethylation in surgically resected non-small cell lung carcinomas

Journal Journal of thoracic oncology

Volume 6

Number 10

Pages / Article-Number 1649-57

Keywords p16, Expression, Deletion, Hypermethylation, Non-small cell lung cancer

The role of p16 is gaining importance in non-small cell lung cancer (NSCLC) because of epigenetic therapy options. Further insight into the significance of protein expression, gene status and promoter methylation is needed and has the potential to optimize existing treatment strategies.
