Title Maternal laboratory stress influences fetal neurobehavior : cortisol does not provide all answers

Journal The journal of maternal fetal & neonatal medicine

Volume 23

Number 6

Pages / Article-Number 488-500

Keywords Maternal stress, fetal neurobehavior, fetal heart rate variation, cortisol, maternal-fetal pathways

Maternal stress can have an impact on pregnancy. However, effects on fetal neurobehavior are not well understood. In this study, the effect of laboratory stress on maternal psychoneuroendocrinological response and on fetal neurobehavior was studied. Serum cortisol as a potential underlying mechanism was measured.
