Research Project

mGlu5 Identification of novel auxiliary mGlu5 subunits extending the pharmacological and functional receptor repertoire

Third-party funded project

Project title mGlu5 Identification of novel auxiliary mGlu5 subunits extending the pharmacological and functional receptor repertoire

Principal Investigator(s) [Bettler, Bernhard](#) ;

Organisation / Research unit

Departement Biomedizin / Molecular Neurobiology Synaptic Plasticity (Bettler)

Department

Project start 01.10.2010

Probable end 30.09.2014

Status Completed

asd

Financed by

Private Sector / Industry
