

Research Project

Sexual Health and Pharmaceutical Care

Project funded by own resources

Project title Sexual Health and Pharmaceutical Care

Principal Investigator(s) [Hersberger, Kurt](#) ; [Arnet, Isabelle](#) ;

Co-Investigator(s) [Clifford, Rhonda](#) ;

Organisation / Research unit

Departement Pharmazeutische Wissenschaften / Pharmaceutical Care (Hersberger)

Project start 01.09.2012

Probable end 31.12.2014

Status Completed

First Project: Chlamydia screening in community pharmacies

Chlamydia trachomatis is the most commonly encountered Sexually Transmitted Infection (STI). Since the infection is mostly asymptomatic in women, screening of persons at risk is a public health issue. Our colleagues from the University of Western Australia investigated self-reported risk factors for Chlamydia in community pharmacies by interviewing emergency contraception consumers.

First a master student from Basel will join the team in Perth (Western Australia), to help in developing the design of a Chlamydia study, and to evaluate its feasibility in Switzerland.

Keywords Chlamydia, screening, pharmaceutical care
