

## Research Project

### Usage of meta-analyses in psychological research

#### **Project funded by own resources**

**Project title** Usage of meta-analyses in psychological research

**Principal Investigator(s)** [Kossowsky, Joe](#) ;

#### **Organisation / Research unit**

Departement Psychologie / Klinische Psychologie und Psychotherapie (Gaab)

**Project start** 01.10.2011

**Probable end** 01.10.2014

**Status** Completed

Meta-Analyses refers to the statistical analyses that are used to synthesize summary data from a series of studies. In our project, we utilize this method to investigate various research questions with regard to placebo research, especially in the field of child- and adolescent psychology, and adherence research.
