Title Genome sequences of two plant growth-promoting fluorescent Pseudomonas strains, R62 and R81

Journal Journal of bacteriology

Volume 194

Number 12

Pages / Article-Number 3272-3

Plant growth-promoting rhizobacterial (PGPR) strains R62 and R81 have previously been isolated and characterized as part of the Indo-Swiss Collaboration in Biotechnology. Here we present the draft genome sequences of these two PGPR strains, with the aim of unraveling the mechanisms behind their ability to promote wheat growth.
