Title Die Stele Sen(y)nefers und Grabkegel (Cones) aus dem Tal der Könige

Journal Göttinger Miszellen

Volume 222

Pages / Article-Number 9–12

Keywords Valley of the Kings, Archaeology, Antiquity dealer, Stelae

During the excavation project of the Egyptological Seminar of the University of Basel a stelae and some cones of private men were found in the Valley of the Kings. It could be proved that these objects must be brought many years ago to the Valley of the Kings to be sold by antiquity dealer. This fact shows that the find spot is not always the original place of deposition.
