

Research Project

Onsurface covalent assembly of coordination polymers with integrated read and write functions

Third-party funded project

Project title Onsurface covalent assembly of coordination polymers with integrated read and write functions

Principal Investigator(s) [Housecroft, Catherine](#) ;

Co-Investigator(s) [Jung, Thomas](#) ;

Organisation / Research unit

Departement Chemie / Anorganische Chemie (Housecroft)

Department

Project start 01.10.2013

Probable end 30.09.2017

Status Completed

Ligand design for onsurface covalent assembly of coordination polymers; application of surface techniques and design of on-surface assemblies with integrated read and write functions

Keywords surfaces, self assembly, surface techniques

Financed by
