A revision of the genus *Laccosternus* Brancucci, 1983 (Coleoptera, Dytiscidae)

Book Item (Buchkapitel, Lexikonartikel, jur. Kommentierung, Beiträge in Sammelbänden)

ID 2291434

Author(s) Brancucci, Michel; Vongsana, Khosada

Author(s) at UniBasel [Brancucci, Michel L.](#) ;

Year 2013

Title A revision of the genus *Laccosternus* Brancucci, 1983 (Coleoptera, Dytiscidae)

Editor(s) Brancucci, Michel; Nagel, P; Kolibac, J; Geiser, M

Book title Beetle diversity of Laos Part 1

Volume Part 1

Publisher Basel: Pro Entomologia

Place of publication Basel

Pages S. 129-135

ISSN/ISBN 978-3-7234-0101-9

Series title Entomologica Basiliensia et Collectionis Frey

Number 34

The genus *Laccosternus* was described for a species from Sumatra, *L. grouvellei* (Regimbart). In the course of our recent investigation in Laos, a new species was found in the province of Savannakhet. It is described here as *Laccosternus krausi* sp.nov. It is here compared to the single previously known species and its status within the genus is discussed. The most important characters are illustrated and the habitat thoroughly described. The known distribution and ecology of the two species are briefly outlined. Several characters that are generally used and accepted as reliable for phylogenetic analysis are discussed.
