Research Project

Deforestation and land degradation in north eastern Namibia

Project funded by own resources

Project title Deforestation and land degradation in north eastern Namibia

Principal Investigator(s) [Kuhn, Nikolaus J.](#) ;

Project Members [Wingate, Vladimir](#) ;

Organisation / Research unit

Departement Umweltwissenschaften / Physiogeographie und Umweltwandel (Kuhn)

Project start 01.08.2013

Probable end 31.07.2016

Status Completed

The research project focuses on the acquisition and generation of data to inform future greenhouse gas emission reduction initiatives in the northern communal areas of Namibia. The primary aim lies on quantifying the extent and trends of land-cover change, estimating forest biomass and accounting for the quantity of avoided emissions from deforestation.
