

Research Project

Electrochemical impedance spectroscopy

Third-party funded project

Project title Electrochemical impedance spectroscopy

Principal Investigator(s) [Housecroft, Catherine](#) ;

Organisation / Research unit

Departement Chemie / Anorganische Chemie (Housecroft)

Department

Project start 01.07.2014

Probable end 31.12.2014

Status Completed

The use of electrochemical impedance spectroscopy for the development of dye sensitized solar cells, both n-type and p-type.

Financed by
