Title Agricultural Extension for the Progressive or Marginal Farmer? The T & V System in some Sri Lankan Villages

Journal/Series title Lifelong Learning Research Conference Proceedings. February 21-22, 1985

Pages 115-119

Publisher University of Maryland, Department of Agricultural & Extension Education

This paper examines whether the contact farmer selection in the T & V System is biased towards wealthier farmers, and its implications for development. 1984 survey data on 130 contact and follow farmers from 10 villages in Sri Lanka's Gampaha District are used in cross-tabulations and discriminant analyses.
