Research Project

Moth diversity along elevation gradients

Project funded by own resources

Project title Moth diversity along elevation gradients

Principal Investigator(s) [Beck, Jan](#) ;

Organisation / Research unit

Departement Umweltwissenschaften / Biogeographie (Nagel)

Project start 01.09.2013

Probable end 30.07.2015

Status Completed

Initiated during a Workshop in Budweis, we compiled data for geometrid moths along a large number of elevation gradients across the globe and analyze them for consistent patterns of diversity with elevation. The project has many more collaboration partners than listed here.

Financed by

University funds
