Universität Basel

Research Project

“Self-defending” polymer surfaces: A new strategy to protect medical devices against infection

Third-party funded project

Project title “Self-defending” polymer surfaces: A new strategy to protect medical devices against infection
Principal Investigator(s) Palivan, Cornelia ;
Organisation / Research unit
Departement Chemie / Makromolekulare Chemie (Meier)
Department
Project start 01.04.2015
Probable end 31.03.2018
Status Completed
<!–[if gte mso 9]> <![endif]–>

<!–[if gte mso 9]> Normal
Keywords seld-defending surfaces, device associated infections, passive and active strategies, nanoreactors, polymer membranes
Financed by
Swiss National Science Foundation (SNSF)
