Universität Basel

Research Project

A highly efficient implementation of direct GPU to GPU communication in a library for direct exchange calculations

Third-party funded project

Project title A highly efficient implementation of direct GPU to GPU communication in a library for direct exchange calculations
Principal Investigator(s) Goedecker, Stefan ;
Project Members Degomme, Augustin ;
Organisation / Research unit
Departement Physik / Physik (Goedecker)
Department
Project start 01.06.2015
Probable end 31.05.2017
Status Completed
A higjhly efficient GPU based excat exhange library will be developped

Financed by
Swiss Government (Research Cooperations)
