Research Project

NeRAB Polyneuropathien

Third-party funded project

Project title NeRAB Polyneuropathien

Principal Investigator(s) [Ernst, Beat](#) ;

Co-Investigator(s) [Herrendorff, Ruben](#) ;

Organisation / Research unit

Departement Pharmazeutische Wissenschaften / Molekulare Pharmazie (Ernst)

Department

Project start 01.07.2015

Probable end 31.12.2016

Status Completed

The aim of this project is to establish and validate an immunological mouse model for anti-MAG neuropathy. In this mouse model, a novel antigen-specific therapeutic approach, based on autoantibody-scavenging glycopolymers, will be evaluated.

Keywords Anti-MAG neuropathy, autoantibodies, mouse model
