Research Project

Plasma-Facing Materials & Components and Diagnostics for Plasma-Wall Interaction Studies

Third-party funded project

Project title Plasma-Facing Materials & Components and Diagnostics for Plasma-Wall Interaction Studies

Principal Investigator(s) [Marot, Laurent](#) ;

Co-Investigator(s) [Meyer, Ernst](#) ;

Organisation / Research unit

Departement Physik / Nanomechanik (Meyer)

Department

Project start 01.05.2015

Probable end 30.04.2018

Status Completed

The following work programme is based on Plasma-Facing Materials & Components and Diagnostics for Plasma-Wall Interaction Studies are divided in three work packages: wall reflection (WP1), life time of mirrors (WP2) and ammonia formation (WP3).
