Research Project

Integrality Properties in the Moduli Space of Elliptic Curves (PhD thesis project)

Project funded by own resources

Project title Integrality Properties in the Moduli Space of Elliptic Curves (PhD thesis project)

Principal Investigator(s) [Habegger, Philipp](#) ;

Project Members [Schmid, Stefan](#) ;

Organisation / Research unit

Departement Mathematik und Informatik / Zahlentheorie (Habegger)

Project start 01.04.2014

Probable end 31.12.2018

Status Completed

This is the Ph.D. project of Stefan Schmid who is working on integrality properties in the moduli space of elliptic curves. Related topics include Tate-Voloch type questions for Hilbert modular surfaces and beyond.
