Title A new species of the genus Arthrodosis Reitter, 1900 (Coleoptera: Tenebrionidae: Erodiini) from Iran

Journal Annales Zoologici

Volume 65

Number 2

Pages / Article-Number 167-169

A new darkling beetle species, Arthrodosis taravatii sp. nov., of the tribe Erodiini (Coleoptera: Tenebrionidae), is described from Iran. It can be distinguished from its congeners by a unique structure of antennae (elongated terminal antennomeres). A key for the Iranian species of Arthrodosis is provided.
