## Publication

Ice nucleators have shorter persistence in the atmosphere than other airborne bacteria

### Discussion paper / Internet publication

**ID** 3694007

**Digital Object Identifier DOI** 10.5194/bg-2016-496

**Author(s)** Stopelli, Emiliano; Conen, Franz; Guilbaud, Caroline; Zopfi, Jakob; Alewell, Christine; Morris, Cindy

**Author(s) at UniBasel** [Stopelli, Emiliano](#) ; [Zopfi, Jakob](#) ; [Alewell, Christine](#) ; [Conen, Franz](#) ;

**Year** 2017

**Month and day** 11-24

**Title** Ice nucleators have shorter persistence in the atmosphere than other airborne bacteria

**Volume** 14

**Number** 5

**Publisher / Institution** Copernicus

**URL** <http://www.biogeosciences-discuss.net/bg-2016-496/>

**ISSN** 1726-4170 ; 1726-4189

**edoc-URL** <http://edoc.unibas.ch/51911/>

**Full Text on edoc** No;
