FV-51: Barriers to Exit and the Quality of Partnerships, An Analysis of Monetary Unions

Project funded by own resources

Project title FV-51: Barriers to Exit and the Quality of Partnerships, An Analysis of Monetary Unions **Principal Investigator(s)** Weder, Rolf ; Hohl, Lukas ;

Organisation / Research unit

Departement Wirtschaftswissenschaften / Aussenwirtschaft und Europ. Integration (Weder) Departement Wirtschaftswissenschaften / WWZ Forum

Project start 01.01.2016

Probable end 31.12.2016

Status Completed

We intend to answer the question how the existence and the size of barriers to exit affect the quality of partnerships, in general. We thereby focus on the European Monetary Union (EMU) which does not include precise rules regarding the exit of members, but nevertheless is affected to some extent by the possibility that a country may exit. The question arises in which way barriers to exit affect the efficiency and stability of a monetary union.
