Title Achiral Cyclopentadienone Iron Tricarbonyl Complexes Embedded in Streptavidin: An Access to Artificial Iron Hydrogenases and Application in Asymmetric Hydrogenation

Journal Catalysis Letters

Volume 146

Number 3

Pages / Article-Number 564-569

Keywords Homogeneous catalysis, Hydrogenation, Bio-inspired, Asymmetric catalysis

We report on the synthesis of biotinylated (cyclopentadienone)iron tricarbonyl complexes, the in situ generation of the corresponding streptavidin conjugates and their application in asymmetric hydrogenation of imines and ketones.
