Astrophysical reaction rates as a challenge for nuclear reaction theory

ConferencePaper (Artikel, die in Tagungsbänden erschienen sind)

ID 401417

Author(s) Rauscher, T.

Author(s) at UniBasel [Rauscher, Thomas](#) ;

Year 2010

Title Astrophysical reaction rates as a challenge for nuclear reaction theory

Editor(s) Tanihara, I and Shima, T and Ong, HJ and Tamii, A and Kishimoto, T and Toki, H and Kajino, T and Kubono, S

Book title (Conference Proceedings) The 10th International Symposium on Origin of Matter and Evolution of Galaxies

Volume 1269

Place of Conference 10th International Symposium on Origin of Matter and Evolution of Galaxies (OMEG10), Osaka, JAPAN, MAR 08-10, 2010

Publisher AIP Press

Place of Publication Woodbury, NY

Pages S. 247-254

ISSN/ISBN 978-0-7354-0819-7

The relevant energy ranges for stellar nuclear reactions are introduced. Low-energy compound and direct reactions are discussed. Stellar modifications of the cross sections are presented. Implications for experiments are outlined.

Series title AIP Conference Proceedings
