

Research Project

Chronos

Project funded by own resources

Project title Chronos

Principal Investigator(s) Schuldert, Heiko ;

Co-Investigator(s) Vogt, Marco ;

Project Members Stiemer, Alexander ; Lengweiler, David ;

Organisation / Research unit

Departement Mathematik und Informatik / Databases and Information Systems (Schuldert)

Project start 01.05.2017

Probable end 31.12.2023

Status Completed

Evaluations are an important part of research and development. While they are daily business for every database engineer, most engineers are recurrently facing the same problems: How to automate, monitor and analyze the results in a straightforward and intuitive way and how to guarantee reproducibility? With Chronos we have developed an evaluation system which presents a solution to these major challenges.
