Research Project

Statistical Modelling of Facial Ageing: Phase 3

Third-party funded project

Project title Statistical Modelling of Facial Ageing: Phase 3

Principal Investigator(s) [Vetter, Thomas](#) ;

Co-Investigator(s) [Bouabene, Ghazi](#) ;

Organisation / Research unit

Departement Mathematik und Informatik / Computergraphik Bilderkennung (Vetter)

Department

Project start 01.12.2017

Probable end 01.06.2019

Status Completed

The project aims to build stochastic models of the development wrinkles and spots in faces during aging.

Financed by

Private Sector / Industry
