

Research Project

5G: Modeling risk perception in the Swiss general public

Third-party funded project

Project title 5G: Modeling risk perception in the Swiss general public

Principal Investigator(s) [Frey, Renato](#) ;

Organisation / Research unit

Departement Psychologie / Cognitive and Decision Sciences (Mata)

Department

Project start 01.08.2019

Probable end 31.12.2021

Status Active

What drives individual differences in the general public's risk perception of 5G, the latest generation of cellular network technology? To what extent does risk perception potentially adapt across time? And how are individuals' risk perceptions associated with policy-related attitudes? This project aims at addressing these questions with a series of representative population surveys in Switzerland, using a mixed cross-sectional and longitudinal design, as well as including a field experiment.
