Pages / Article-Number 1617-1623

Mesh terms Adolescent; Adult; Aged; Aged, 80 and over; Aging, genetics, pathology; Algorithms; Brain, diagnostic imaging, growth & development; Brain Diseases, diagnostic imaging, genetics; Child; Child, Preschool; Female; Genome-Wide Association Study; Humans; Infant; Magnetic Resonance Imaging; Male; Mental Disorders, diagnostic imaging, genetics; Middle Aged; Neuropsychological Tests; Schizophrenia, genetics, pathology; Sex Characteristics; Young Adult

Common risk factors for psychiatric and other brain disorders are likely to converge on biological pathways influencing the development and maintenance of brain structure and function across life. Using structural MRI data from 45,615 individuals aged 3-96 years, we demonstrate distinct patterns of apparent brain aging in several brain disorders and reveal genetic pleiotropy between apparent brain aging in healthy individuals and common brain disorders.
