Research Project

QUSTEC PhD fellowship - Scanning probe microscopy of atomic structures and molecular assemblies on superconductive materials

Third-party funded project

Project title QUSTEC PhD fellowship - Scanning probe microscopy of atomic structures and molecular assemblies on superconductive materials

Principal Investigator(s) [Meyer, Ernst](#) ;

Organisation / Research unit

Departement Physik / Nanomechanik (Meyer)

Department

Project start 01.02.2020

Probable end 31.01.2024

Status Completed

COFUND-PhD Project with partners from KIT with the topic "Scanning probe microscopy of atomic structures and molecular assemblies on superconductive materials".

Financed by

Commission of the European Union
