Research Project

Jijiga One Health Initiative

Project funded by own resources

Project title Jijiga One Health Initiative

Principal Investigator(s) [Zinsstag, Jakob](#) ;

Co-Investigator(s) [Kuhn, Nikolaus J.](#) ;

Project Members [Stofer Goldschmidt, Sandra](#) ;

Organisation / Research unit

Departement Umweltwissenschaften / Physiogeographie und Umweltwandel (Kuhn)

Project Website <https://www.swisstph.ch/en/about/eph/human-and-animal-health/one-health-east-africa>

Project start 01.01.2015

Probable end 31.12.2025

Status Active

The interdisciplinary project aims to improve training for students of human and veterinary medicine, and subsequently to establish an interdisciplinary centre of excellence for health at the local university. Jijiga University aims to become the health centre for pastoralist communities in the Horn of Africa, and eventually an attractive partner for neighbouring universities in Ethiopia, Somalia and Kenya. Cooperation between the various educational and research institutions will foster long term the activities of the SDC and its partners in addressing health and food security-related issues.

The Physical Geography and Environmental Change Research Group contributes to the project through graduate student training, PhD supervision, exploration of remote sensing tools for assessing land quality and the development of soil and GIS labs at Jijiga University.

Keywords One Health, landscape ecology, remote sensing
