Title Ice and Beyond: Tetrahedral Building Blocks in Crystalsa

Journal Chimia

Volume 74

Number 9735

Pages / Article-Number 735-736

Keywords 3D structures û Education û Hydrogen bond û Ice û Polymorph û Silica

Tetrahedral building blocks are immensely important in inorganic materials. The structure of ice is ideal for presenting this concept, combined with an introduction to hydrogen bonding. Connecting tetrahedral building blocks is then extended to polymorphs of silica.
