

Research Project

Implementation strategy for pharmaceutical care services in community pharmacies (fokusřPDCA)

Project funded by own resources

Project title Implementation strategy for pharmaceutical care services in community pharmacies (fokusřPD-CA)

Principal Investigator(s) [Arnet, Isabelle](#) ;

Co-Investigator(s) [Baumgartner, Pascal](#) ;

Project Members [Hersberger, Kurt](#) ;

Organisation / Research unit

Departement Pharmazeutische Wissenschaften / Pharmaceutical Care (Hersberger)

Project start 01.01.2019

Probable end 31.12.2022

Status Completed

Community pharmacies are in the best position to provide services to the population such as counselling on medication therapy management, vaccinating, or improving medication adherence, among others. In the last years, two major services have been cancelled in Europe: the MUR (Medication Use Review) in the UK and the PMC (Polymedikation-Check) in Switzerland, questioning the success of nationwide implementation. In this project, a strategy for the individualized implementation of services on pharmacy-level has been developed. It will be tested in community pharmacies starting new services such as vaccination or screening for covid-19.
