

## Research Project

### Novel Cancer-Targeted Nanoparticles

#### Project funded by own resources

**Project title** Novel Cancer-Targeted Nanoparticles

**Principal Investigator(s)** [Palivan, Cornelia](#) ;

**Co-Investigator(s)** [Benenson, Yaakov](#) ;

**Project Members** [Skowicki, Michal Jerzy](#) ;

#### **Organisation / Research unit**

Departement Chemie / Physikalische Chemie (Palivan)

**Project start** 01.01.2019

**Probable end** 30.06.2021

**Status** Completed

The objective of the project is to facilitate clinical application of the unique drug platform developed by TargImmune Therapeutics, cancer-targeted nanoparticles activating immune system, by better understanding its mode of action as well as thorough characterization of nanoparticle physicochemical properties

#### **Financed by**

University funds
