Addressing arguments that comparative philosophy is itself impossible, or that it is indistinguishable from philosophy more generally, this collection challenges myopic understandings of comparative method and encourages a more informed consideration. Bringing together a wide variety of methodological options, it features scholars spread across the globe representing multiple philosophical traditions. From the beginnings of comparative philosophy in the 19th century to present-day proposals for more global philosophy departments, every chapter serves as a viable methodological alternative for any would-be philosophical comparativist. With contributions from leading comparativists that are both distinctive in their method and explicit about its application, this valuable resource challenges and enriches the awareness and sensitivity of the beginning comparativist and seasoned veteran alike.
