Title Dragonflies that Change Colour: Nature's Hidden Redox Chemistry

Journal Chimia

Volume 76

Number 10

Pages / Article-Number 869-870

Keywords Chemical education, Natural colour changes, Redox chemistry

The colour distinction between male and female, and between young and mature male dragonflies of the genera *Crocothemis* and *Sympetrum* arises from simple redox chemistry. This natural phenomenon has inspired the development of a class of electrochromic device
