Title Tracing the Sars-CoV-2 Impact: The First Month in Switzerland

Journal Transport Findings

Volume May

Number May

This note describes the changes in travel behaviour in response to the spread of the Sars-CoV-2 epidemic in Switzerland. The existing analyses of the Google or the national Intervisa data have limits due to missing socio-demographic details about their users. We briefly describe our GPS tracking panel and its sample. The analyses focus on the changes for different income groups and for the differences in accessibility. It will be supplemented by the weekly <https://ivtmobis.ethz.ch/mobis/covid19/reports>
