Probable end 31.12.2015

Status Completed

Since 1990 the archaeozoological research group of IPAS is constructing a special database system for recording archaeozoological determination data. This system is called "OSSOBOOK". 2007 a cooperation with the archaeozoological research group of the University Munich was established. Together both research groups are now working to become "OSSOBOOK" the new international standard of recording archaeozoological data. This work and the cooperation is part of the international network of European archaeobiological labs called "BIOARCH".
