

Research Project

Nanowissenschaften - Konzeption und umweltpolitische Etablierung von Technologierisiken im internationalen Vergleich

Third-party funded project

Project title Nanowissenschaften - Konzeption und umweltpolitische Etablierung von Technologierisiken im internationalen Vergleich

Principal Investigator(s) [Kurath, Monika](#) ;

Organisation / Research unit

Departement Gesellschaftswissenschaften / Wissenschaftsforschung (Maasen)

Department

Project Website <http://wifo.unibas.ch/>

Project start 01.06.2006

Probable end 28.02.2010

Status Completed

Nano sciences and nanotechnologies (NST) are currently considered as leading innovation fields, generating comprehensive expectations regarding its developmental potential. Globally, annual investment in research and development within this field exceed the billion-dollar mark and most industrial nations established national NST related research and development initiatives and programs. Apart from the scientific and economic euphoria, various social actors have started to debate on potential impacts and toxicological studies reported adverse health effects of nanoscale materials. This has led to regulatory discussions in various countries and on the international level. This comparative project analyzes NST related risk concepts in the regulatory discourse and focuses on the ways they influence national and international legislation. Drawing on examples out of chemicals and agricultural biotechnology regulation, it aims at showing in what way, transatlantic differences in the legislation of those fields will influence the emerging regulation of NST.

Keywords Risk, Toxic Chemicals, Biotechnology, Comparison, Environmental regulation, Nanosciences, Umweltpolitik, Risiko, Nanotechnologies, Gentechnik, Nanowissenschaften

Financed by

Swiss National Science Foundation (SNSF)
