

Research Project

SCCER CREST - Sectoral Effects of Energy Policy and Energy Market Regulation

Third-party funded project

Project title SCCER CREST - Sectoral Effects of Energy Policy and Energy Market Regulation

Principal Investigator(s) [Krysiak, Frank Christian](#) ;

Co-Investigator(s) [Weigt, Hannes](#) ;

Organisation / Research unit

Departement Wirtschaftswissenschaften / Umweltökonomie (Krysiak)

Departement Wirtschaftswissenschaften / Energieökonomik (Weigt)

Department

Project Website <http://www.sccer-crest.ch/>

Project start 01.01.2014

Probable end 31.12.2016

Status Completed

This task will analyze the interactions within a specific sector (e.g., electricity, buildings, transport) and use this knowledge to develop recommendations for new concepts for market regulation and energy policy. In particular, we will work on:

- Policies and market designs that support the development and integration of renewable energy and can replace Switzerland's current feed-in tariff scheme after 2020,
- Policies and market designs for promoting energy efficiency in the residential sector (buildings, appliances, mobility) and the business sector (processes, buildings, transport), e.g., white certificate schemes or demand side management programs
- Analysis of interdependencies of different policies/ market regulations that address the same sector.

Financed by

Innovation Promotion Agency CTI
