

Research Project

The Role of Thymine DNA Glycosylase in the Maintenance of Genetic and Epigenetic Stability and the Suppression of Tumorigenesis.

Third-party funded project

Project title The Role of Thymine DNA Glycosylase in the Maintenance of Genetic and Epigenetic Stability and the Suppression of Tumorigenesis.

Principal Investigator(s) [Schär, Primo Leo](#) ;

Project Members [Kunz, Christophe](#) ;

Organisation / Research unit

Departement Biomedizin / Molecular Genetics (Schär)

Department

Project start 01.07.2008

Probable end 30.06.2010

Status Completed

The Role of Thymine DNA Glycosylase in the Maintenance of Genetic and Epigenetic Stability and the Suppression of Tumorigenesis.
